Surplus Power Cogeneration in Sugar Industry – K.R.Patil

ACKNOWLEDGEMENTS

With my deep sense of gratitude, I humbly acknowledge Hon. Shri Sharadchandraji Pawar, President, VSI for having encouraged me for writing this book. I am especially indebted to Hon. Shri Shivajirao Deshmukh, Director General, VSI for his constant motivation and his benevolent support in this mammoth assignment.

I will be failing in my duty if I do not acknowledge the support of leading machinery manufacturing companies in the field of cogeneration for willingly sharing their proprietary technical information.

Them being:

- Boiler : Uttam Energy, S.S.Engineers, Sitson, ISGEC
- Steam turbine : BHEL, Triveni India
- Cooling tower : Gammon India, Paharpur cooling Tower, India
- Water treatment plant : Thermax, Ion-Exchange, Pune
- Flue gas handling fan : Engi-Con Airtech, Pune
- Fuel handling system : New Tech- Hubali
- Automation & Instrumentation : Indpro, India

I am thankful to expert designers of boilers Shri Lalwani and Shri Nilesh Jadhav from M/s. Sitson India, Shri Prataprao Deshmukh from M/s Indpro, India who spared their valuable time for giving suggestions and helping me to resolve some technical details of my work.

Shri P.G. Patil played a pivotal role in editing the electrical section of this book and I am grateful to him.

Finally, my young team of engineers Shri D.N. Shitole, Shri G. A. Gaikwad and Shri R.P.Takale, deserve special thanks for the help they rendered for preparation of technical write-up.

I am extremely thankful to Shri Avadhut who handled the job of preparing the first manuscript of this book with joy. I am grateful to Shri Shriram Patil, Chief Artist, VSI for cover design and layout.

Finally, I thank all my staff for their support without which it was not possible to undertake this endeavor.

K. R. Patil
